"Groups of Amateur Radio operators around the globe have built and sent dozens of Amateur Radio communications and science satellites to orbit since the first, OSCAR-1, was launched on December 12, 1961. That date already held a special place in radio history as it was the 60th anniversary of the first radio transmission across the Atlantic Ocean. Indeed, on December 12, 1901, Guglielmo Marconi completed his now-famous transmission and reception of Morse code for the letter S – three dots – from England to Newfoundland." – see page 18 for the complete story.
